## STORE LOCATIONS

---

In 2019, we were asked to install multiple features to existing checkout lanes in Target franchises.

## GEOGRAPHICALLY NATIONWIDE

---

## 1 OVERNIGHT COMPLETION AVERAGE

---

Their vision was to create an aesthetically pleasing experience from beginning to end of the shopping experience. Each job is completed in 1 night.

## AREAS OF EXPERTISE

We have a great partnership with technicians across the country whom we have trained to install 30 different lane styles within Target stores across the country. The client wants to know that no matter where in the country and how different the checkout lanes are from one another that they consistently look great across the country while staying on brand. Our experience should be shown as we have now done this program for six years and going on year seven! This collaborative program was created with the help of Sky and Pan Oston working together.
